Research-Driven Foundation

Audience Insight

Defined primary users as independent travellers seeking curated travel inspiration with minimal planning friction.

Pain Points Addressed

- Lack of trustworthy, centralised travel content
- Overwhelming planning interfaces
- Low mobile usability in existing blogs

User Behaviour Patterns

Considered mobile-first browsing behaviours commonly seen in travel content platforms, and high affinity for short, image-rich content formats.

Design Implications

- Designed compact cards to keep layout light
- Minimized overload using progressive disclosure
- Prioritised fast load and mobile image performance

Design Choices Informed by Strategy

Outcome-Oriented Design

Design choices focused on encouraging deeper exploration and reducing browsing friction

UX Goals

- Inspire quickly through bold visuals
- Reduce decision fatigue with clear CTAs
- Improve content discoverability via smart grouping

Strategic UX Moves

- Content layered visually (inspiration » information » action)
- Swipe-able cards for exploration without fatigue
- Contextual CTAs placed where intent is highest

Validation & Refinement

- Conducted internal reviews at key milestones
- Iterated content spacing and CTA wording for mobile
- Incorporated stakeholder inputs post-prototype review

Demonstrating visual consistency and reusable design patterns

Color Palette

-  Primary Colour: #0077CC
-  Accent Colour: #FF6B35
-  Light (Page) BG: #FFFFFF
-  Surface Card Colour: #FFFFFF
-  Text Primary Colour: #222222
-  Text Muted Colour: #666666

Button Styles

- » **Primary CTA Button:** 
 - Background (BG) - #FF6B35 | Border - None
 - Text - White | Corner Radius - 50px
 - Padding - 10px 20px
 - Hover - #222222 (BG colour darkens)
- » **Secondary Button:** 
 - Background - #FFFFFF | Border - None
 - Text - #222222 | Corner Radius - 15px
 - Padding - 8px 20px | Hover - Bluish Shadow

Typography System

- » **Headline Font:** (Hero Section)
 - Playfair Display - 40pt
 - Weight - *Italics* | Colour - White
 - Purpose - Elegant travel vibes
- » **Subhead Font:** (Section Headings)
 - Roboto - 28pt
 - Weight - Medium | Colour - #222222
 - Purpose - Clear, friendly headers.
- » **Body Font:**
 - Roboto - 23pt
 - Weight - Regular | Colour - #222222
 - Purpose - Clean, readable layout.
- » **Button Text:**
 - Roboto - 23pt
 - Weight - Medium | Colour - #222222
 - Purpose - Bold, quick CTAs.
- » **Caption:**
 - Roboto - 20pt
 - Weight - Regular | Colour - #666666
 - Purpose - Subtle, readable metadata.

Card Design Pattern

- Fixed width card with image on top
- Text content includes: Location Name
- ‘Read Guide’ with muted underline
- Hover effect: Soft shadow + slight lift

Mobile considerations

- Cards scale fluidly to 100% width
- Button padding reduced for vertical fit
- Smaller body and caption text.
- Tap area maintained at 48px minimum

Closing Reflections & Learnings

Insights gained through the design journey

Design Wins

- Turned a content-heavy idea into a clean, scannable site
- Balanced visual storytelling with utility-driven navigation
- Created reusable UI patterns for lasting design consistency
- Built a responsive, thumb-friendly experience for all devices

What I'd Do Differently

- Explore traveller personas (family, budget, business)
- Explore alternate mobile content densities during early concept validation
- Define tracking early to guide real-world content grouping

Skills Strengthened

- Planned responsive layout across visuals and content
- Micro UX thinking at component and breakpoint level
- Strengthened use of scalable, documented UI systems
- Sharpened case study writing for strategic UX storytelling

Next Steps

- Add dark mode for accessibility and night browsing
- Explore multilingual version to support global reach
- Refine CTA positioning using real user interaction data
- Introduce personalised destination recommendations
