Profile

Senior Enterprise Product Designer with 11+ years of experience designing complex B2B platforms, operational dashboards, and enterprise workflow systems across web and mobile ecosystems. Specialises in simplifying high-density operational environments through scalable UX architecture, structured information systems, and data-driven interface design.

Experienced across audit, compliance, governance, workforce operations, and tax-focused enterprise platforms. Focused on transforming fragmented operational processes into intuitive, scalable product experiences that improve usability, visibility, and cross-functional efficiency.

Combines strategic UX thinking with front-end implementation awareness (HTML/CSS) to create scalable systems, streamline developer collaboration, and support scalable product implementation.

Professional Experience

Aria Technologies Private Limited | Pune, India

Senior Enterprise Product Designer | Feb 2015 – Present

- Led UX strategy and product design optimisation for enterprise SaaS platforms supporting audit, governance, workforce management, and compliance workflows. Focused on simplifying complex operational processes through scalable UX architecture and structured workflow design.
- **KPMG India (Tax Navigator, Insights Edge, Internal Apps, Innovation Experience)**: Designed enterprise platforms supporting tax operations, cybersecurity workflows, governance systems, and immersive innovation-centre experiences. Simplified complex business requirements into scalable, usability-focused product experiences while maintaining operational clarity across high-density enterprise interfaces.
- **Raymond Limited (Audit Portal & Freelance App)**: Led product UX design for enterprise audit and workforce platforms focused on workflow simplification, operational efficiency, and role-based usability across high-volume business environments.
- Collaborated closely with front-end developers to ensure scalable implementation feasibility, responsive consistency, and consistent interaction behaviour across web and mobile platforms.
- Contributed to scalable UX consistency across enterprise products by aligning interaction patterns, information structures, and usability standards across multiple business-critical platforms.

Selected UX Case Studies

- **CheckWise Dashboard Redesign:** Re-architected a legacy enterprise audit platform by improving operational visibility, restructuring data hierarchy, and simplifying high-density workflows, resulting in 25% faster task completion.
- **AuditIQ Dashboard:** Designed an enterprise control-management platform focused on audit governance, workflow accountability, and operational tracking across 70+ enterprise controls.
- **Nomad Notes Website:** UX exploration focused on responsive content architecture, mobile usability, and structured content discoverability across editorial layouts.
- **MindMeld App Concept:** UX exploration focused on low-friction mobile workflows, accessibility, and emotionally sensitive interaction design.

Earlier Experience

Technical Animator & Rigging Artist

Digitales Studios, Mumbai, India | 2013 – 2015

Visual Media Solutions Pvt. Ltd., Chandigarh, India | 2010 – 2013

Built systems-oriented technical problem-solving foundations through animation production workflows and rigging environments.

Core Capabilities
