Abhishek Jain

Partner and National Head - Indirect Tax, KPMG in India

Gross Goods and Services Tax (GST) collection grew 9.9 per cent in March to over INR1.96 lakh crore – the second-highest mop-up ever, government data showed on Tuesday.

GST revenue from domestic transactions rose 8.8 per cent to INR1.49 lakh crore, while revenue from imported goods was higher 13.56 per cent to INR46,919 crore.

The gross collection includes Central GST mop-up of INR38,145 crore, State GST collection of INR49,891 crore and Integrated GST (IGST) of INR95,853 crore. Cess collection during March stood at INR12,253 crore.

Total refunds during March rose 41 per cent to INR19,615 crore.

After adjusting refunds, net GST revenue stood at over INR1.76 lakh crore in March 2025, a 7.3 per cent growth over the year-ago period.

Role:Lead UI Designer

🕒

Timeline:3 months (with multiple iterations)

💻

Platform:Public Mobile App (Android & iOS)

Highlights:

• Designed a public-facing mobile experience for tax insights, events, and knowledge discovery.

• Aligned with KPMG's global colour, typography and spacing standards.

• Structured complex content into scannable, card-based experiences across articles, bookmarks, and preferences.

• Designed interaction patterns for content discovery, bookmarking, and personalised recommendations.

• Delivered developer-ready UI assets and collaborated closely with KPMG stakeholders throughout implementation.

Project Context

KPMG Tax Navigator is a public mobile application designed to help professionals explore curated tax articles, insights, and event updates. The client required a modern interface that maintains brand consistency while improving content discoverability, preference-based curation, and cross-section engagement.

My Role

Lead UI Designer responsible for visual design direction, interaction design, high-fidelity UI design, and cross-screen consistency across the application. Collaborated closely with KPMG stakeholders to translate complex tax content into an intuitive mobile experience.

Key Problems Identified

- Dense tax content was difficult to scan and consume on mobile devices
- Content discovery, bookmarking & personalisation lacked clear UX patterns
- Visual design did not fully reflect KPMG's global digital brand

Design Process

- Structured content taxonomy across services, sectors and categories
- Established a scalable hierarchy for content-heavy mobile experiences
- Designed reusable UI patterns aligned with KPMG's global brand guidelines
- Delivered implementation-ready assets through iterative reviews

UX Highlights

- Simplified complex tax content through intuitive UI design
- Designed modular, card-based layouts for articles, events, and media
- Integrated bookmarking, preferences, and PDF reading across sections

✓ Outcome

- Successfully launched as a public mobile application on Android and iOS
- Adopted as part of KPMG's tax content and event engagement ecosystem
- Recognised by stakeholders for visual clarity, usability, and content discoverability

KPMG Tax Navigator App — Live Product
